ABSTRACTED-PUB-NO: EP 649736A

BASIC-ABSTRACT:

A car rear parcel shelf sepg. the passenger area from the boot and having a substantially flat surface and built-in reinforcement is made in a single stage by pressing in a cold mould (10, 20) at a pressure of 10-30 bar. The press is loaded with

a stack of a first skin (5) of stampable reinforced thermoplastic, a honeycomb core of thermoplastic (3), a second skin of stampable reinforced thermoplastic (4) and an outside covering (6) of woven or non-woven material. The two skins (4, 5) are preheated to softening point before being placed in the mould.

ADVANTAGE - The shelf is sound absorbing, mechanically strong, light, contains no metal reinforcement, and is economical to produce and easily recycled.
